

Pankaj Trivedi

Curriculum Vitae

Part I – General Information

Full Name	Pankaj Trivedi
Present position	Full Professor, Department of Experimental Medicine, Sapienza University, Rome, Italy.

Part II – Education

Type	Year	Institution	Notes (degree, thesis title)
Bachelor of Science	1983	Sardar Patel University Vallabh Vidyanagar Pincode: 388120, Gujarat, India	B.Sc. (Microbiology)
Master of Science	1985	Sardar Patel University Vallabh Vidyanagar Pincode: 388120, Gujarat, India	M.Sc. (Microbiology)
Ph.D.	1995	Karolinska Institute, Stockholm, Sweden	Doctoral dissertation title: Epstein-Barr virus growth transformation associated proteins: Effects on immunogenicity and phenotype of the tumor cells
National Scientific eligibility	2014	ANVUR	Eligibility for full Professor in the sector 06/N1, call 2012

Part III – Appointments

III A – Academic Appointments

Start	End	Institution	Position
Sep 1995	Sep 1998	Neuromed Institute, Pozzilli, Italy	Postdoc
Oct 1998	Oct 2001	Department of experimental Medicine, Sapienza University, Rome	Senior Postdoc
Nov 2001	Oct 2020	Department of Experimental Medicine, Sapienza University, Rome	Associate Professor

Nov 2020	Present	Department of Experimental Medicine, Sapienza University, Rome	Full Professor
----------	---------	----------------------------------------------------------------	----------------

III B – Other Appointments

Start	End	Institution	Position
Sep 2001	Oct 2001	Hokkaido University Medical School, Sapporo, Japan	Visiting Scientist
Oct 2016	March 2017	Beth Israel Deaconess Medical Center, Harvard Medical School, Boston, USA	Visiting Professor
2015	present	Sapienza University, Rome	Responsible for the international academic mobility (RAM), Erasmus program for Physiotherapy undergrad course, San Giovanni Addolorato Hospital.

III C – Editorial/reviewer expertise

	Journal	Position
2012-Present	MicroRNA journal	Associate Editor
2018	International Journal of Molecular Sciences	Guest Editor, Special issue on microRNAs in human diseases
2019-present	Scientific Reports, Nature Publishing Group.	Editorial Board Member
2019	BMC Pulmonary Medicine	Reviewer
03/2019	Oncology Letters	Reviewer
10/2018	Frontiers in Immunology	Reviewer
08/2018	Scientific Reports	Reviewer
2018	Journal of Cellular Physiology	Reviewer
11/2018	PLoS One	Reviewer
03/2018	Eur J Hematology	Reviewer
09/2018	Scientific Reports	Reviewer
06/2018	Cell Death and Differentiation	Reviewer
2018	International Journal of Cancer	Reviewer
06/2017	Scientific Reports	Reviewer
2017	Cancers	Reviewer
2017	Molecular Carcinogenesis	Reviewer
2017	Pathogens	Reviewer

The list of journals for which I have served recently as reviewer can be found at:
<https://publons.com/researcher/1263361/pankaj-trivedi/>

III D – International Grant reviewer

	Grant Agency	Position
2010	AICR, (now known as Worldwide Cancer research), UK	Reviewer
2013	Food and Health Bureau of the Government of the	Reviewer

	Hong Kong Special administrative region, People's Republic of China	
2013	Maturation and Accelerating Translation With INdustry, MATWIN, French Cancéropôles network, France	Reviewer

Part IV A – Teaching experience (undergraduate, post graduate and doctorate courses)

Year	Institution	Lecture/course
1992	Department of General Pathology and Experimental Medicine, Sapienza University Rome	Invited lecturer. Epstein-Barr virus and lymphoma: A practical course.
1996-1998	Neuromed Institute, Pozzilli (IS), Degree course in Physiotherapy, Sapienza University	Scientific English
2001-present	Degree course in Physiotherapy, San Giovanni Addolorato Hospital, Course C, Sapienza University, Rome	Coordinator and docent of General Pathology and Microbiology
2017-present	Sapienza University, Rome	President of the Degree course in Physiotherapy, corso C, San Giovanni Addolorato Hospital, Rome
2001-present	Sapienza University, Rome	Supervision of 6 doctorate students, PhD degree course in Experimental Medicine
2001-present	Sapienza University, Rome	Supervision of experimental thesis of 10 undergraduate students
2004-2006	Ph.D. school in the Pathologies of the neck organs (Patologie degli organi del collo), Sapienza University, Rome.	Board Member
2012-2019	Sapienza University, Rome. PhD school in life sciences (Dottorato: Scienze della vita)	Board Member
2013-present	Sapienza University, Rome	Master in Molecular Virology, Sapienza University
2014-present	Sapienza University, Rome	Undergraduate course in Biotechnology. Lectures: MicroRNA and diseases

Part IV B: International Ph.D. Examiner and Erasmus supervisor

	Institution	Thesis title
2018	Calcutta University, India	Analysis of Regulation of Self Renewal Pathways And EGFR Expression In Uterine Cervical Carcinoma Of Indian Patients. Candidate: Dr. Sudip Sammader
2017	Calcutta University, India	Molecular Analysis Of DNA Damage Response Pathways In Breast Cancer. Candidate: Dr. Hemantika Dasgupta
2016	Calcutta University, India	Effect of Tea and Tea Polyphenols (EGCG and TF) on Stem Cell renewal pathways during oral and liver carcinogenesis induced by N-nitrosodiethylamine (NDEA): Candidate: Dr. Subhayan Sur

2014	Jadavpur University, India	Analysis of HPV 16/18 profiling and identification of candidate tumor suppressor genes loci in chromosome 11 associated with development of uterine cervical carcinoma of Indian patients. Candidate: Dr. Dipanjana Indra
2012	Jadavpur University, India	Molecular analysis of development of carcinogenesis in an experimental model of 20 methyl cholanthrene induced transformed murine embryonal fibroblast cells in culture. Candidate: Dr. Sudeshna Mukherjee
2015-present	Erasmus Incoming students to Sapienza Uni.	Aberdeen University, UK; Université Paris Descartes, France and Aristotle University, Thessaloniki, Greece.

Part V A - Society memberships, Fellowships, Awards, Honors

Year	Title
2017-present	Associate Member of the American Association for Cancer Research (AACR)
2018-present	Founding Member of the Italian Society of translational Research and Paramedical professions (SIRTEPS).
2016	Winner of Yamagiwa-Yoshida Award Memorial International Cancer Study Grant, Union for International Cancer Control, UICC.
1996-97	International AIDS research fellowship from the Italian national health Institute (Istituto Superiore di Sanità)
1998	Fellowship from the Pasteur Institute, International Network, Rome, Italy
1999-2001	Fellowship from Italian Cancer research Association (AIRC)
1995	Travel grant from the Swedish Cancer Society, Cancerfonden, Sweden
1991-1995	Fellowship from Karolinska Institute, Stockholm, Sweden
1986-91	Fellowship from the Cancer Research Institute, New York and Concern foundation, Los Angeles, USA

Part V B- Patent and media coverage

2019	Patent WO/2019/232160 RNA aided immunotherapeutics. Inventors: Trivedi (Sapienza), Slack (Harvard Medical School, Boston, USA) and Anastasiadou (Harvard/Sapienza). https://patentscope.wipo.int/search/en/detail.jsf?docId=WO2019232160&_cid=P10-K6248M-32632-1

Part VI – Research Activities

Key words	Brief Description
EBV	
Burkitt lymphoma	
DLBCL	
microRNA	
Biomarkers	
Latency	
Immune checkpoints	
Tumor immunogenicity	
RNA aided immunotherapy	
3D microfluidic chips	<p>The unifying theme of my research interests is to understand molecular mechanisms underlying oncogenic potential of the first human oncogenic virus, namely, Epstein-Barr virus (EBV) and how the results obtained could be translated into novel diagnostic, prognostic and therapeutic approaches for EBV associated cancers.</p> <p>a. Establishment of a murine model to investigate immunogenicity of viral proteins: Early in my career at Karolinska Institute in Stockholm, I established a syngeneic murine model system to evaluate immunogenicity of EBV encoded latent proteins. I showed that EBNA1, a viral protein present in all EBV infected tumor cells is non-immunogenic. Using the same model, subsequently I demonstrated that LMP1 which is expressed in all nasopharyngeal carcinomas (NPC), has evolved to be non-immunogenic.</p> <p>b. EBV and phenotypic changes in associated cancers: Another important focus of my research is how EBV induces phenotypic changes in the infected tumor cells which help the virus to avoid immune surveillance. My colleagues and I were the first to report how EBNA2 a virally encoded protein increases BCL2 expression in B cell lymphomas. In epithelial cell model, we showed that E-Cadherin is downregulated by EBV encoded LMP1. I also showed that EBV infected primary effusion lymphomas (PELs) are more tumorigenic than KSHV only positive PELs.</p> <p>c. EBV and cellular oncogene interaction: Together with my colleagues, I have discovered that EBV alters TCL1 oncogene when the infected cells have latency I type viral gene expression. Interestingly, we found that latency III type viral gene expression pattern has the opposite effect on TCL1 expression. Our data showing that latency III related viral genes can negatively affect oncogenes could be critical in designing efficient RNA based therapeutic strategies for EBV associated cancers.</p> <p>d. EBV and alteration of cellular miRNA in B cell lymphomas: Since last 12 years or so, my major research focus is how EBV alters cellular miRNAs to make the infected cells more tumorigenic. My group has been among the first to find that two critically important proteins encoded by EBV, namely EBNA2 and LMP1 can profoundly alter cellular miRNA expression profile. Furthermore, we discovered that in lymphomas, miRNA signature profile depends on the presence of EBV. These data are</p>

	<p>relevant for development of new miRNA based diagnostic approaches for B cell lymphoma.</p> <p>e. EBV, EBNA2 and Immune checkpoint alteration by dysregulation of miRNAs: We have recently shown how EBV encoded EBNA2 downregulates cellular miRNAs and in particular miR-34 to increase PD-L1 expression, which helps the virus infected cells evade immune surveillance. <i>My lab has developed a novel tumor immunogenicity test system based on 3D microfluidic chips, with enormous translational bearings.</i> Given the fact that cancer immunotherapy is successful only in about 30 % of cases, we are currently investigating the combinatorial potential of noncoding RNA and immune checkpoint blockers to reconstitute tumor immunogenicity. A joint international patent (PCT) filed together with my collaborators at Harvard Medical School in Boston, USA, emphasizes the conspicuous translational significance of these results.</p>
